

29 October 1948

y called to express his appreciation for the valuable service FBIS rendered his desk in OREs. He thought that our coverage of China was very good indeed. He requested, however, that some arrangement be made to get the AP and UP material from China to his desk faster. At the present time it is picked up by messenger from ORE but does not reach his desk promptly. 2. In response to srequest and due to the fact that the China situation convanues to deteriorate, I directed that the following action be takens 2. FBIS stations covering China be instructed to give this coverage high priority and to forward their material into Nashington most expeditiously. 3. A check on Monday, Tuesday and Nednesday of next week be made to insure that the time lag between picking up the AF-UP material at FBIS and delivery to it out to an absolute minimum. 3. Arrangements be made if possible to out out all other recipients of the outgoing wire service for a brief period early in the morning and transmit this AF-UP material to CRE ever the wire. In this commention I desire, if possible and not too expensive, to install a switchboard in the wire service room which will permit us to control all circuits from FBIS to our customers.
